Your Security... Our Solutions...!

A large circular graphic containing the central logo for Royal Bridge International. The logo is a gold coin with the text "ROYAL BRIDGE INTERNATIONAL" at the top and "COMMITTED TO QUALITY SERVICES" at the bottom. In the center of the coin is a stylized "RBI" logo in red, blue, and green. Surrounding the central logo are ten smaller circular images, each representing a different security or service solution:

- CCTV System:** Shows various security cameras and a monitor displaying a surveillance feed.
- Time Attendance System:** Displays a collection of time clocks and handheld devices.
- Intrusion Alarm System:** Features a control panel, sensors, and a siren.
- Fire Alarm System:** Includes fire alarm control panels, detectors, and speakers.
- Public Address System:** Shows a microphone, a control console, and speakers.
- Telephone System:** Displays a variety of office telephones and communication equipment.
- EAS System:** Illustrates Electronic Article Surveillance (EAS) tags and detectors.
- Note counting machine:** Shows a large industrial machine used for counting banknotes.
- X-Ray Baggage Scanner:** Depicts a large scanner used for inspecting luggage.
- Video & Audio Intercom:** Shows intercom units and video monitors.
- Parking Systems:** Illustrates automatic barrier gates and license plate recognition technology.
- Walk through Metal Detector:** Shows a person walking through a metal detector.
- Queue System:** Displays digital queue management screens and sensors.

Ensuring your property and assets are protected against theft and vandalism most likely ranks high on your list of everybody concerns. Our tested security systems give you peace of mind.

In the current economy, business must evolve to remain agile and competitive. Since data and service information are at the heart of every organization, technology is intrinsic to achieving business success. As technology and business models evolve, security becomes increasingly imperative to maintain the integrity of corporate networks and safeguard the competitive intelligence, data and communication lines they support. Combine this with the proliferation of threats in the modern day security landscape, increased pressure around compliance and the potentially devastating impact of a security breach, and you have a scenario where business doesn't just rely on IT, it demands secure IT.

CCTV SYSTEM - ANALOG & IP

CCTV System is primarily for surveillance and security purposes. It allows management to view and record high risk areas to deter theft, control, inventory, increase productivity and fraudulent insurance claims. You can't be everywhere at once, but your closed circuit television can.

“Committed to Quality Services”

Access Control & Time Attendance System

Access control lets you Control, Monitor, Report, and Manage access to one location or to multiple locations, ranging from single door to Hundreds in multiple facilities. Access control is a great management tool that enhances safety as it protects valuable assets, both tangible and intangible. We offers a wide range of Access control services and capabilities to all Commercial ,Government, and Institutional customers , including keyless entry, Entry / Exit identification event history, access levels, etc.

Intrusion Alarm System

Intrusion alarms and Burglar alarms are the number one way of preventing break-in into your property , not only to protect your possessions but the occupants as well. It is a proven fact that the risk of burglary is significantly reduced after a burglar alarm is installed.

Public Address system

To make people listen tremendous effort has been put into ensuring that every equipment offers value added functions and innovative solutions in its role for total building communications and management. Public Address system is an electronic amplification system with an amplifier, mixer and loud speakers used to reinforce a given sound and distributing the sound to the general public.

Queue Management System

A queue management system is used to control queues. Queues of people form in various situations and locations in a queue areas A Queue Management system from RBI helps you organize your queues by providing visitors with virtual and linear queuing solutions.

Telephone PBX System

PBX stands for Private Branch Exchange, which is a private telephone network used within a company or organization. The users of the PBX phone system can communicate within their company or organization and the outside world, using different communication channels like Voice over IP, ISDN or analog. A PBX also allows you to have more phones than physical phone lines (PTSN) and allows free calls between users.

An IP telephone system uses packet-switched Voice over IP (VoIP), or Internet telephony, to transmit telephone calls over the Internet as opposed to the circuit-switched telephony used by the traditional Public Switched Telephone Network .

Video & Audio Intercom

RBI video & Audio intercom systems are great for single family homes, offices, apartment buildings and even residential communities. Our intercom systems you never have to wonder who is at your front door again. Not only it gives you and your family piece of mind and extra security.

Parking System

Parking control systems and products are used in automobile parking enforcement and management. A parking control system can control accesses and generates revenue in parking lots and garages. We provide Parking system solutions to fit a variety of applications and needs, whether a component of a high - level security acces control point as a simple barrier to control traffic.

EAS System

Electronic Article Surveillance (EAS) systems are designed to help retailers boost their sales and protect their profits by increasing open merchandising opportunities while reducing shoplifting and internal theft. Our EAS systems are engineered and manufactured for superb detection and deactivation performance, durability, ease-of-use, and aesthetics to match any décor

Fire Alarm, Fire Fighting & FM -200 System

A Fire Alarm Security System is an active fire protection system that detects fire or the effects of fire, and as a result provides one or more of the following: notifies the occupants, notifies persons in the surrounding area, summons the fire service, and controls all the fire alarm components in a building. Fire alarm systems can include alarm initiating devices, alarm notification appliances, control units, fire safety control devices, enunciators, power supplies, and wiring.

Under Vehicle Surveillance System.

An Under-Vehicle Surveillance System is used to detect threats such as bombs, that are hidden underneath of the vehicles. Cameras capture images of the undercarriage of the vehicle for manual or automated visual inspection by security personnel or systems.
